Hello Andrew! Can I assist you with a Health and Safety question today.
4:30 PM

critical controls for excavation
4:30 PM

Saifety Bot
Critical controls for excavation include providing a safe means of getting into and out of an excavation, considering hazardous fumes, arranging for inspections and reports by a competent person, guarding excavations with substantial barriers, and gathering information about ground conditions, underground structures, water courses, and existing services.

ORACLE for Startups

NVIDIA INCEPTION PROGRAM

ABU DHABI GLOBAL MARKET

HUB71

MEET
THE TEAM

We are a group of highly skilled professionals with diverse backgrounds.

Each party brings a wealth of global experience, expertise, creative flair and dedication to the board, each wanting to make an impact through technology.

We are an ADGM registered tech start-up and a Hub 71 Cohort 4 candidates. We are also part of the NVIDIA inception program and a member of the Oracle for Start ups program.

Prakash Senghani
Co-Founder & CEO

DIGITAL INNOVATION AND CONSTRUCTION THOUGHT LEADER WITH **10+ YEARS** OF GLOBAL EXPERIENCE.

Kumar Varsani
Co-Founder & CGO

SILICON VALLEY TECH ENTREPRENEUR, HAVING BUILT MULTIPLE BUSINESSES AND GENERATED COLLECTIVE **REVENUE OF $100M+**

Mukund Hirani
Co-Founder & CTO

INTERNATIONAL THOUGHT LEADER IN CYBER SECURITY, AND A TECHNOLOGY PIONEER WITH **OVER 9 YEARS OF EXP. IN LEADING HIGH-PERFORMING TECH TEAMS**

Milestones Achieved

These milestones are a testament to the usefulness and practicality of Saifety.ai platform in the construction industry.

500k+
Projected Users

Saifety.ai is set to have 500k+ users after successful implementation of ongoing projects.

150+
Demos Delivered

We have successfully carried out 150+ demo of Saifety.ai app for live projects.

sAIfety.ai

Problems we are addressing

01. High injury and death rate in construction industry

02. Replacing existing reactive approach as it has stagnated

03. Have to do not a want to do

04. The risk of health and safety hazards to profits and reputation

05. Tech-enabled solution for outdated traditional methods

06. Improper tracking and closing out the items that have been raised (lack of closure)

Saifety.ai Features & Modules

sAIfety.ai

Monitoring & Tracking

Saifety.ai streamlines safety management with intuitive data capture and AI-driven improvements, easing administrative tasks.

Reporting

Saifety.ai's AI analytics and mobile dashboards facilitate informed, proactive safety management decisions with high-quality data.

...& many more coming soon

Observation Reporting

Observations in behavioural safety management involve active participation in identifying and addressing safety issues, with Saifety.ai streamline this process through user-friendly, conversational reporting via messaging apps.
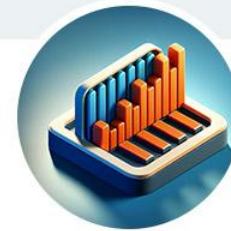

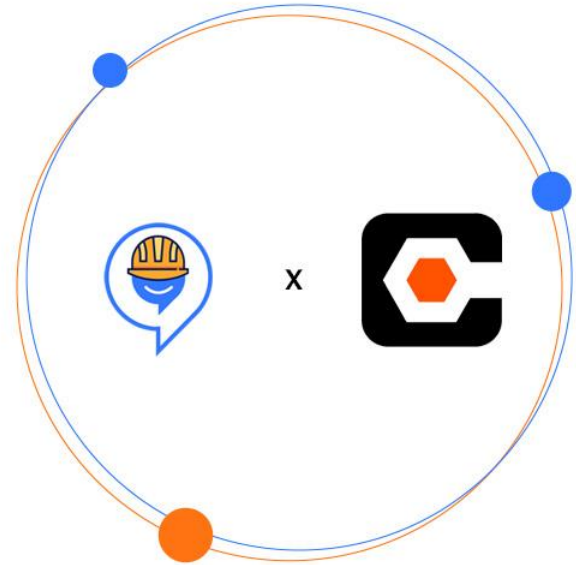

Incident Management

Saifety.ai streamlines incident reporting in safety management, ensuring procedural consistency and using machine learning to enhance future prevention and response.

Easy Integration with Procore

Sync with Procore to streamline all processes and manage all your projects with ease.

We utilise Artificial Intelligence and Machine Learning technology to streamline the data capture, analysis & distribution of information in a Safety Management System.

Engagement Models

Standard	Enterprise
📱 iOS & Android App	**Standard +**
🎛 Dashboards	⇄ Bespoke Workflows
🖥 Admin Portal	❤ 3rd Party Integrations
👁 Observations	🔧 Custom Development
⚠ Incidents	👍 Crisis Management
💬 Project & Private Chat	
👤 User Management	
🔔 Alerts	
✴ COVID-19 Inspection

Saifety Whatsapp Co-Pilot

"Introducing WA Co-Pilot, our initiative to 'be present where the users already are'

Experience instant access to essential health and safety information directly through WhatsApp. It guide, inform, and assist construction workers around the clock, ensuring safety is always a message away.

Try it now

Features

- Supports 20+ languages
- Voice input and output/response
- Can analyse images and pictures
- Provides source reference for further understanding
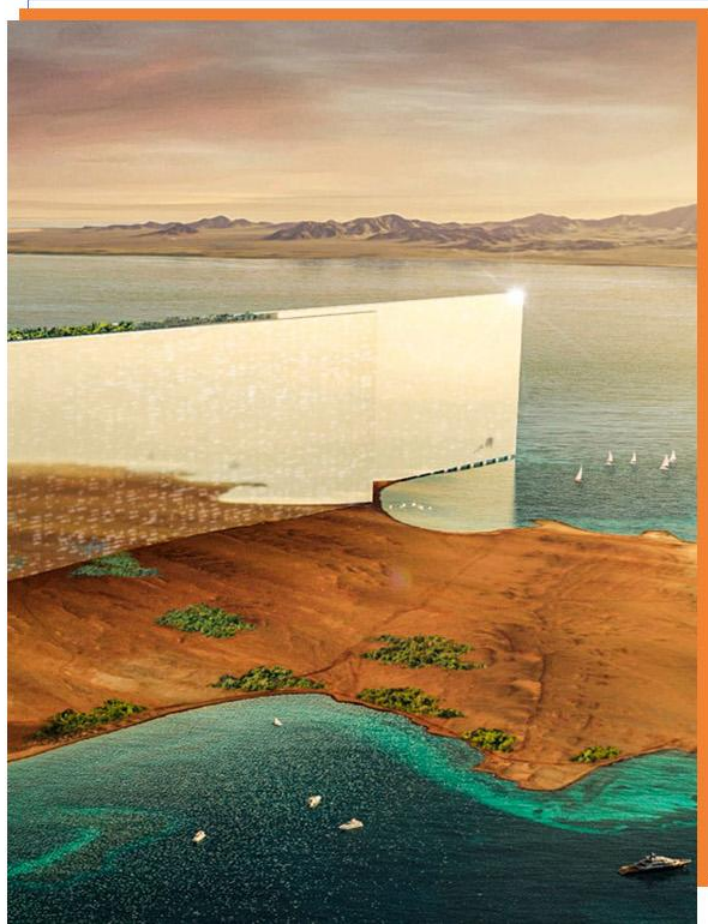

Use-Cases

- Quickly access authoritative and credible health and safety information.
- Easily fetch needed information from a wide database
- Leverage the power of AI to get answer to anything related to HSE
